	e. Ten dormitories for miners, æ follows:
	(1) Five 1-story wooden barracks with two, four, and six rooms;
	(2) Four 1-story brick buildings with 16 rooms; and
	(3) One 2-story brick structure with 2h rooms.
3.	the electric power is supplied by a power plant
	20 miles north of the mine through a transformer station located four kilometers west of the area in a location known as Osmanlii.
4.	the mine is guarded by its own 7-man Militia unit,
	armed with pistols and old Bulgarian rifles, working 4-hour watches of one Militiaman per watch.
5.	near the mine, the ore is shipped by truck to Burgas for transshirment to the USSR
	is extracted from each ton of ore in the mine's ore-crushing and separation plant
	approximately one shipload of ore per week goes to the
6.	mining specialists works at the mine. the mine the mine is a Bulgarian but two Soviet engineers are the de facto administrators.
	Petur Rakanov is director of the mine, which is completely under Soviet control.
7.	there is an acute shortage of miners at the mine.
	Consequently, unreliable persons who do not possess working permits are accepted without too many questions being asked.
	there are now approximately 600 miners employed
	in three 8-hour shifts of 200 men each, each shift mining approximately 170 to 180 tons of ore and each miner receiving 350 leve per day.
8.	the manager of the mine commissary is Rusi Ivenov
